

Price Increase Ahead for Clinton County Electric Aggregation Program in December

Energy Aggregation

Wilmington— 09/22/2025 — “The Board of Clinton County Commissioners have completed reviewing pricing from potential providers for the Clinton County electric aggregation program for the period beginning December 2025, when the current contract expires. It is important to note that, while the program strives to secure the best possible rates, residents should be aware of an upcoming price increase set to take effect.

The program covers communities in the city of Wilmington, Sabina, and countywide incorporated areas, and county villages, including Midland and Port William. The new rate for residential and small commercial aggregation participants stands at a competitive \$0.0898 per kilowatt hour (kWh) for 2026 compared to the current rate of \$0.06570 per kWh.

With the impending price increase, it’s essential to consider the potential impact on your electricity costs. The Clinton County Commissioners understand that many residents are concerned about rising utility expenses, and while the new rate is a result of careful negotiation, it does represent an increase from the previous rate.

If you’re not already enrolled and are interested in taking advantage of this cost-effective program, the Clinton County Commissioners want you to know that it’s not too late to do so. Residents can enroll in the program at any time by reaching out to the current supplier, **Dynegy Energy at 1-888-682-2170**. Please make sure you state **“Clinton County Aggregation Program”**.

Upon enrollment, you will automatically transition to the new contract. It's worth noting that participants have the option to opt out at the time of the new contract and can cancel at any time without incurring any fees.

In 2012, the Clinton County Commissioners introduced the concept of aggregation, providing residents with an opportunity to access bulk pricing for electricity, resulting in reduced rates for those who choose to participate.

Aggregation is an approved government program that authorizes local officials to purchase electricity from a certified electric generation supplier, as recognized by the Public Utilities Commission of Ohio (PUCO). For this contract period, Dynegy Energy was selected as the electric service provider for Clinton County.

While the 2026 aggregation program is set to bring about a price increase, the goal of this initiative remains to secure the best possible rates for residents in an ever-changing energy landscape. To learn more and enroll contact Dynegy Energy today to understand the details and potential cost implications of the upcoming rate adjustment.
